

3LANDERS[®] + MINIMOV[®]

Q2 AND BEYOND

Migration

Your 3Landers are moving to a new contract!

Migrating will ensure that 3Landers will receive royalties.

This increases the sustainability of the project.

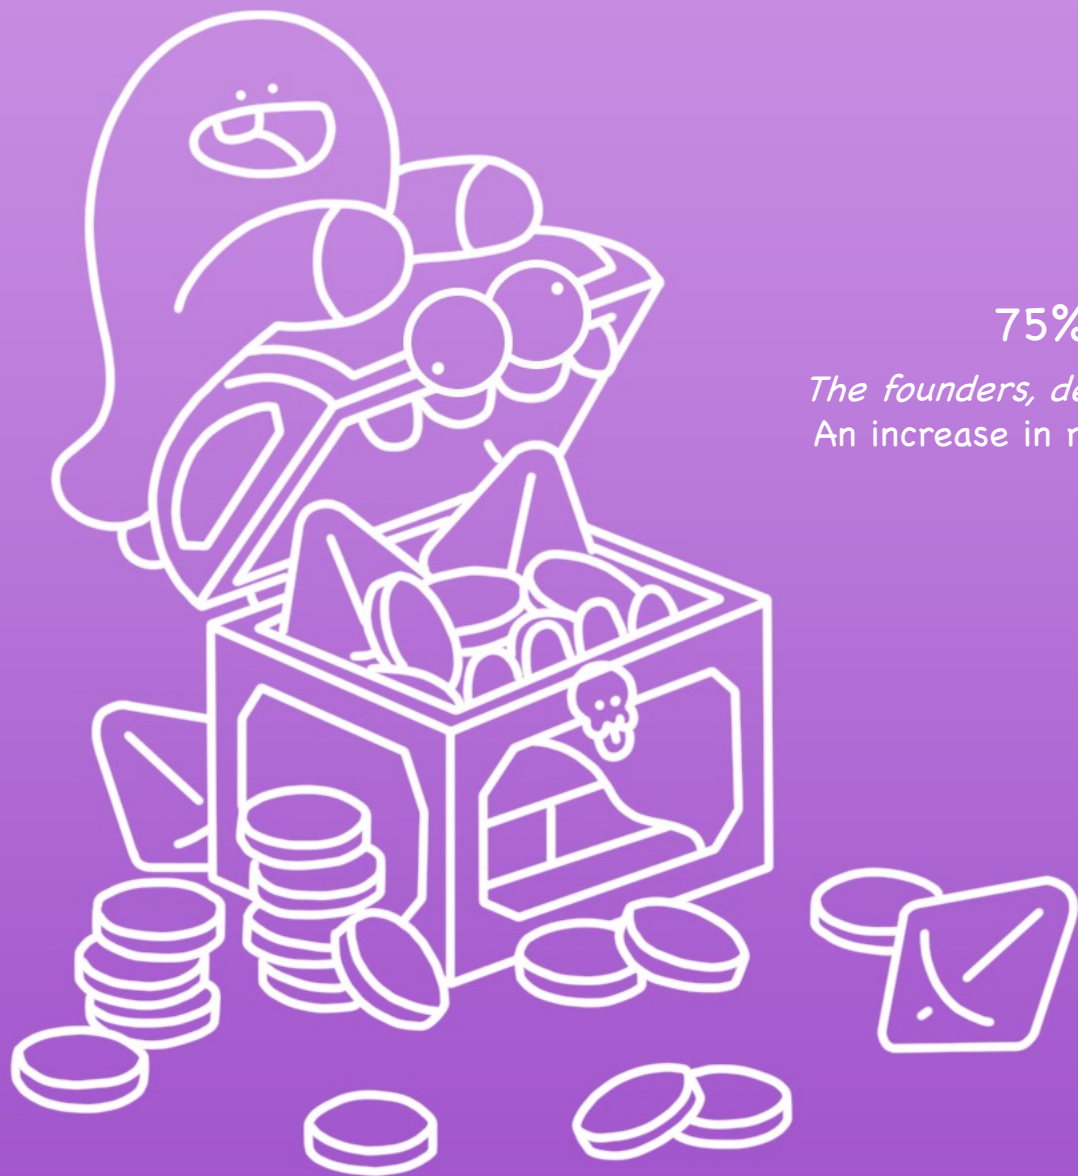

Migration

Things to know:

No action is needed by you!

Your token ID will stay the same.
All of your traits will be identical.

Royalties

75% of royalties will be directed to the treasury

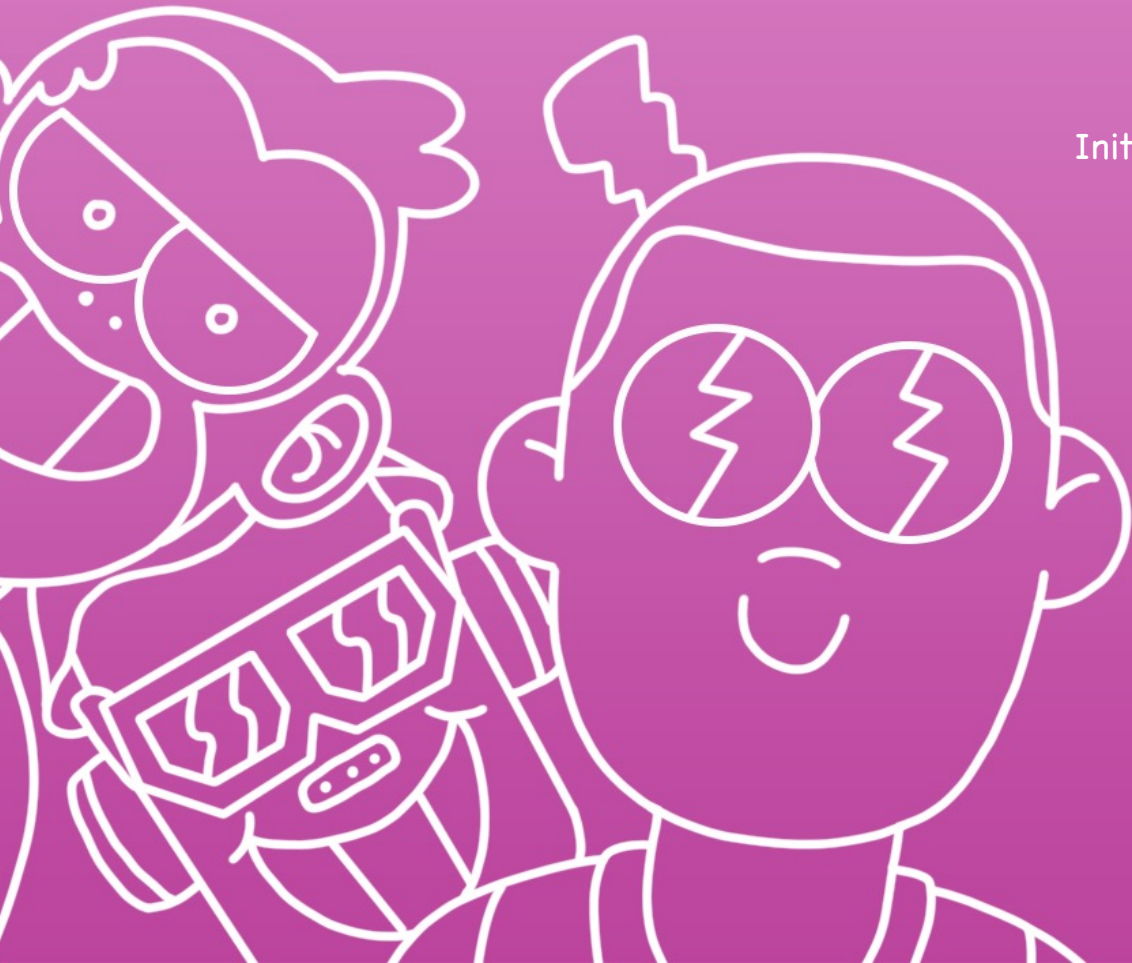

The founders, developers, and executives have reduced or relinquished their royalties.
An increase in royalty allocation combined with a migration will further increase the success of 3Landers and its holders.

Community

3Landers is only as strong as its community

We are listening and will bring new initiatives for stronger engagement.
Initiatives will come in the form of more frequent communication from the team, weekly game nights, community made decisions, working groups, and more.

Community

Community Made Decisions

Changes are coming, be part of the process!

Much like a DAO you will have the opportunity to create proposals, vote and possibly see your idea come to life.

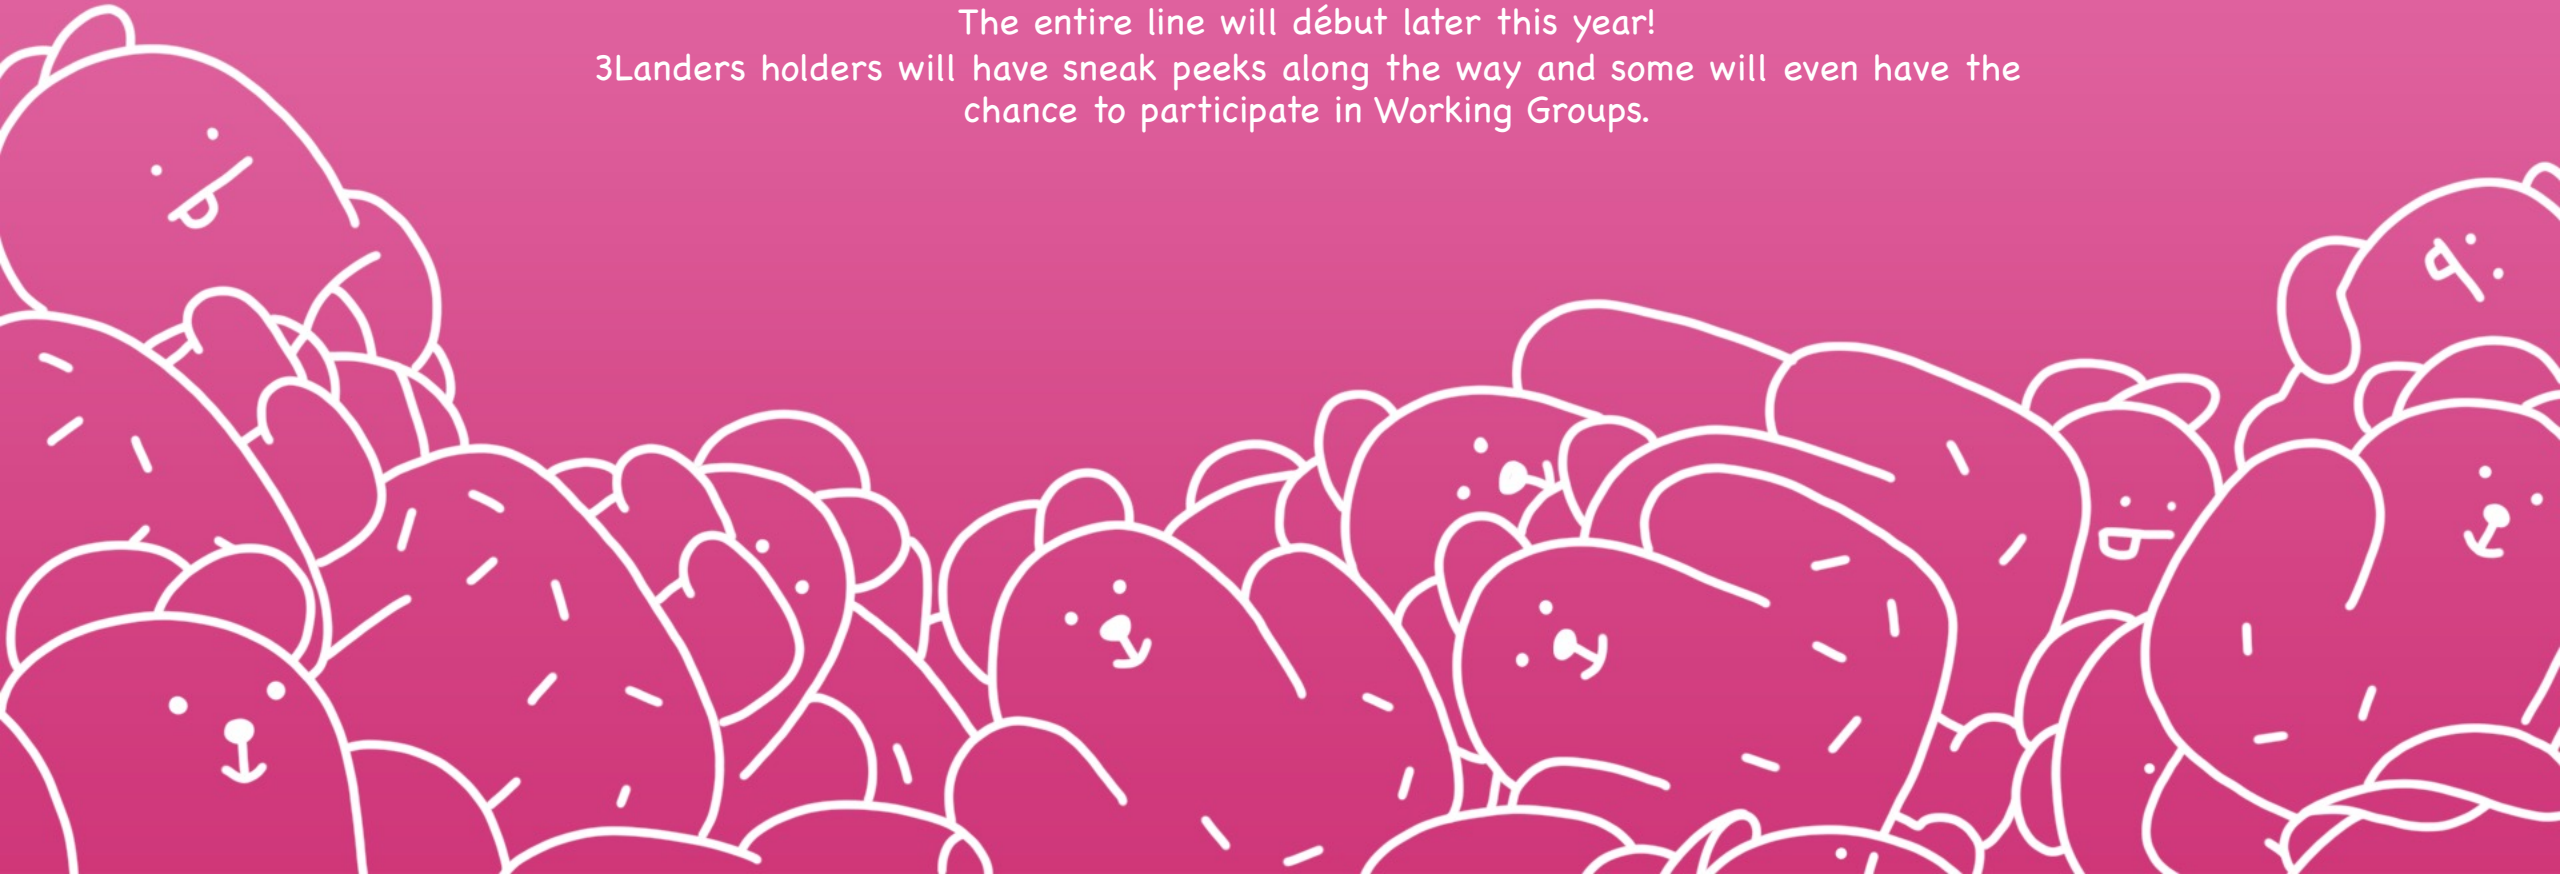

Minimon

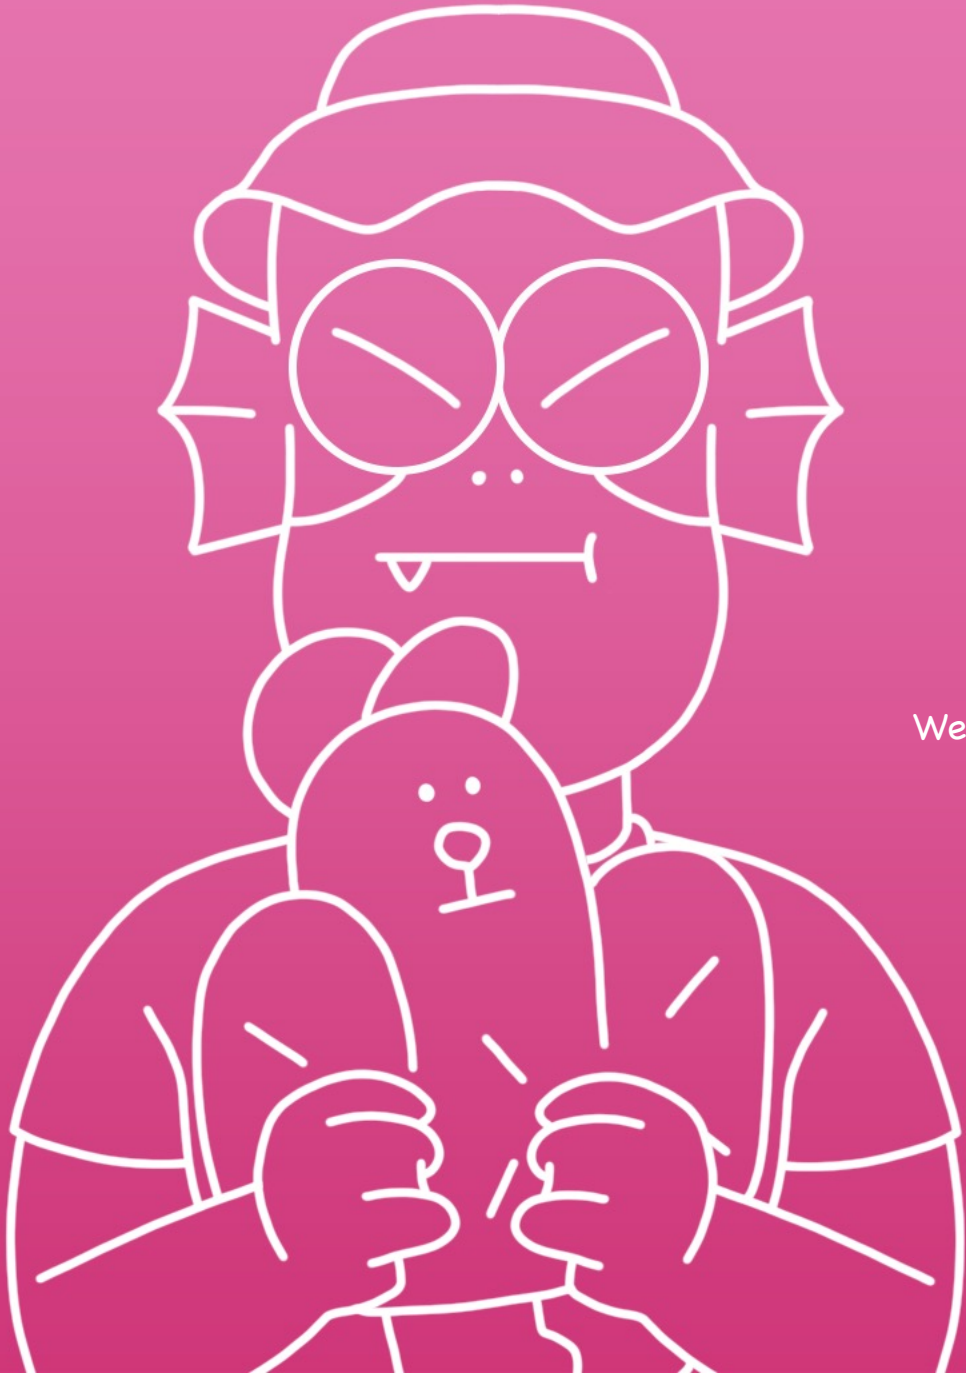

Our companions are taking on a life of their own

Minimon is now recognized as its own brand.

The entire line will début later this year!

3Landers holders will have sneak peeks along the way and some will even have the chance to participate in Working Groups.

3Landers

So many more adventures to come!

Minimon is an extension of 3landers.

We are still working on Web3 experiences beyond The Oasis and can't wait to show you what lies ahead in the 3Landers journey.

Burn

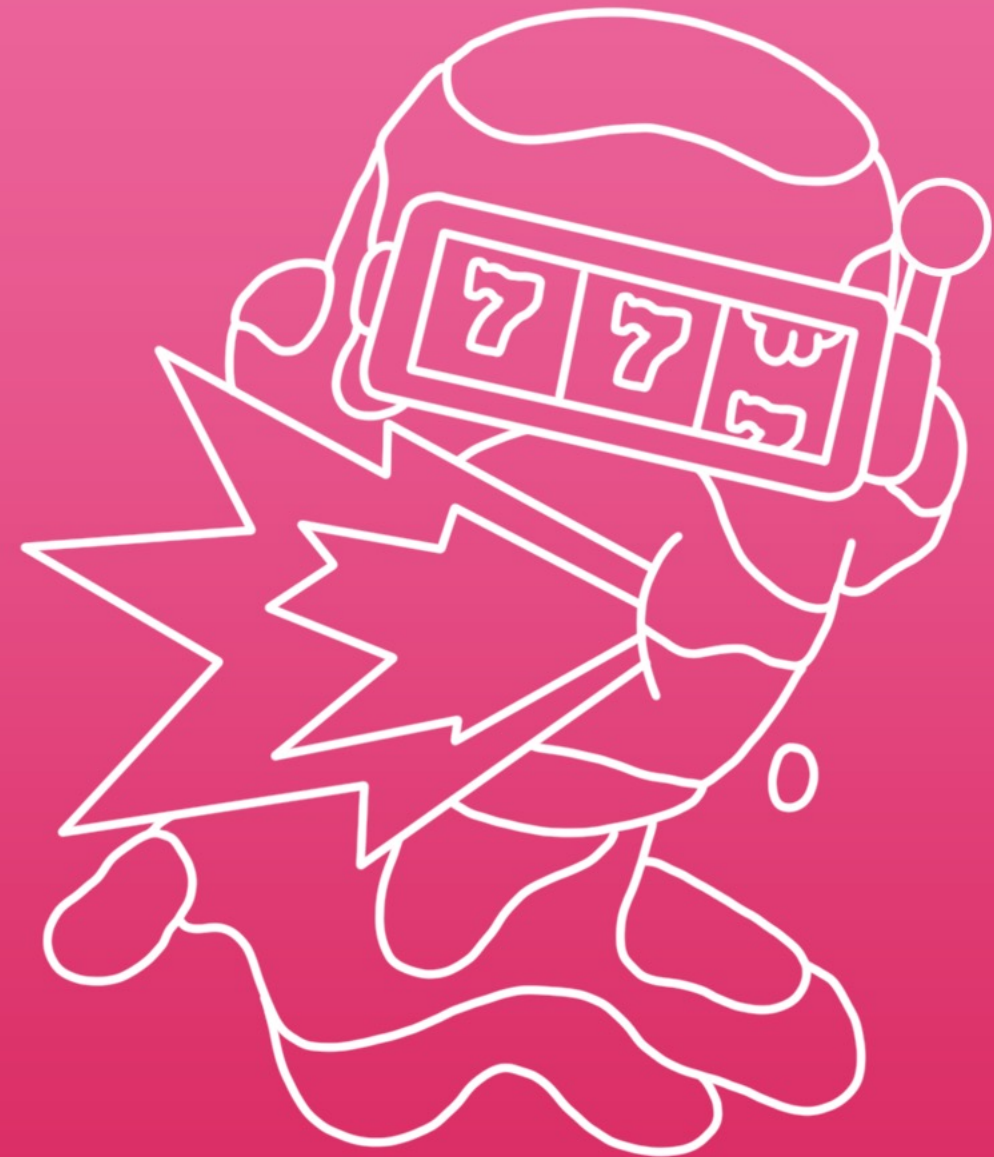

What will you sacrifice for the perfect 3Lander?

In the heat of the summer you'll be able to melt a few 3Landers together.

Burning will allow you to assemble the perfect combination of traits.

Choose a token to burn, pick the traits you want to transfer and say your farewell

More info coming after the migration!

Shards

Mesmerizing bits of The Oasis

The mystery of shards is starting to unfold.

As we venture further into this new realm, we have discovered
that shards can lure in Minimons, new and old...

But that's not all they can do

Working Groups

Minimons have a unique voice, it sounds like yours...

Holding a Minimon on a 3Lander or Biome will be a key to participating in working groups.

A percentage of Minimon revenue will be reserved for participants.

The reserved funds will be distributed to participants based on performance and involvement!

Market Placement

Web2 – Web2.5 – Web3

We are expanding our community and bridging industries

Web2 – New merchandise will be released for 3Landers and Minimon.

Web2.5 – AR experiences and authentication will be combined with products.

Web3 – 3Landers is exploring opportunities with Otherdeeds, World Wide Webb3 and more.

Market Placement

WebX

Why limit ourselves?

3landers entering markets such as kids toys and augmented reality will bring new members to the community, some of which will be engaging with Web3 for their first time.
Webx is an amazing way to cross all Web sectors and provide the most robust experiences!

Timeline

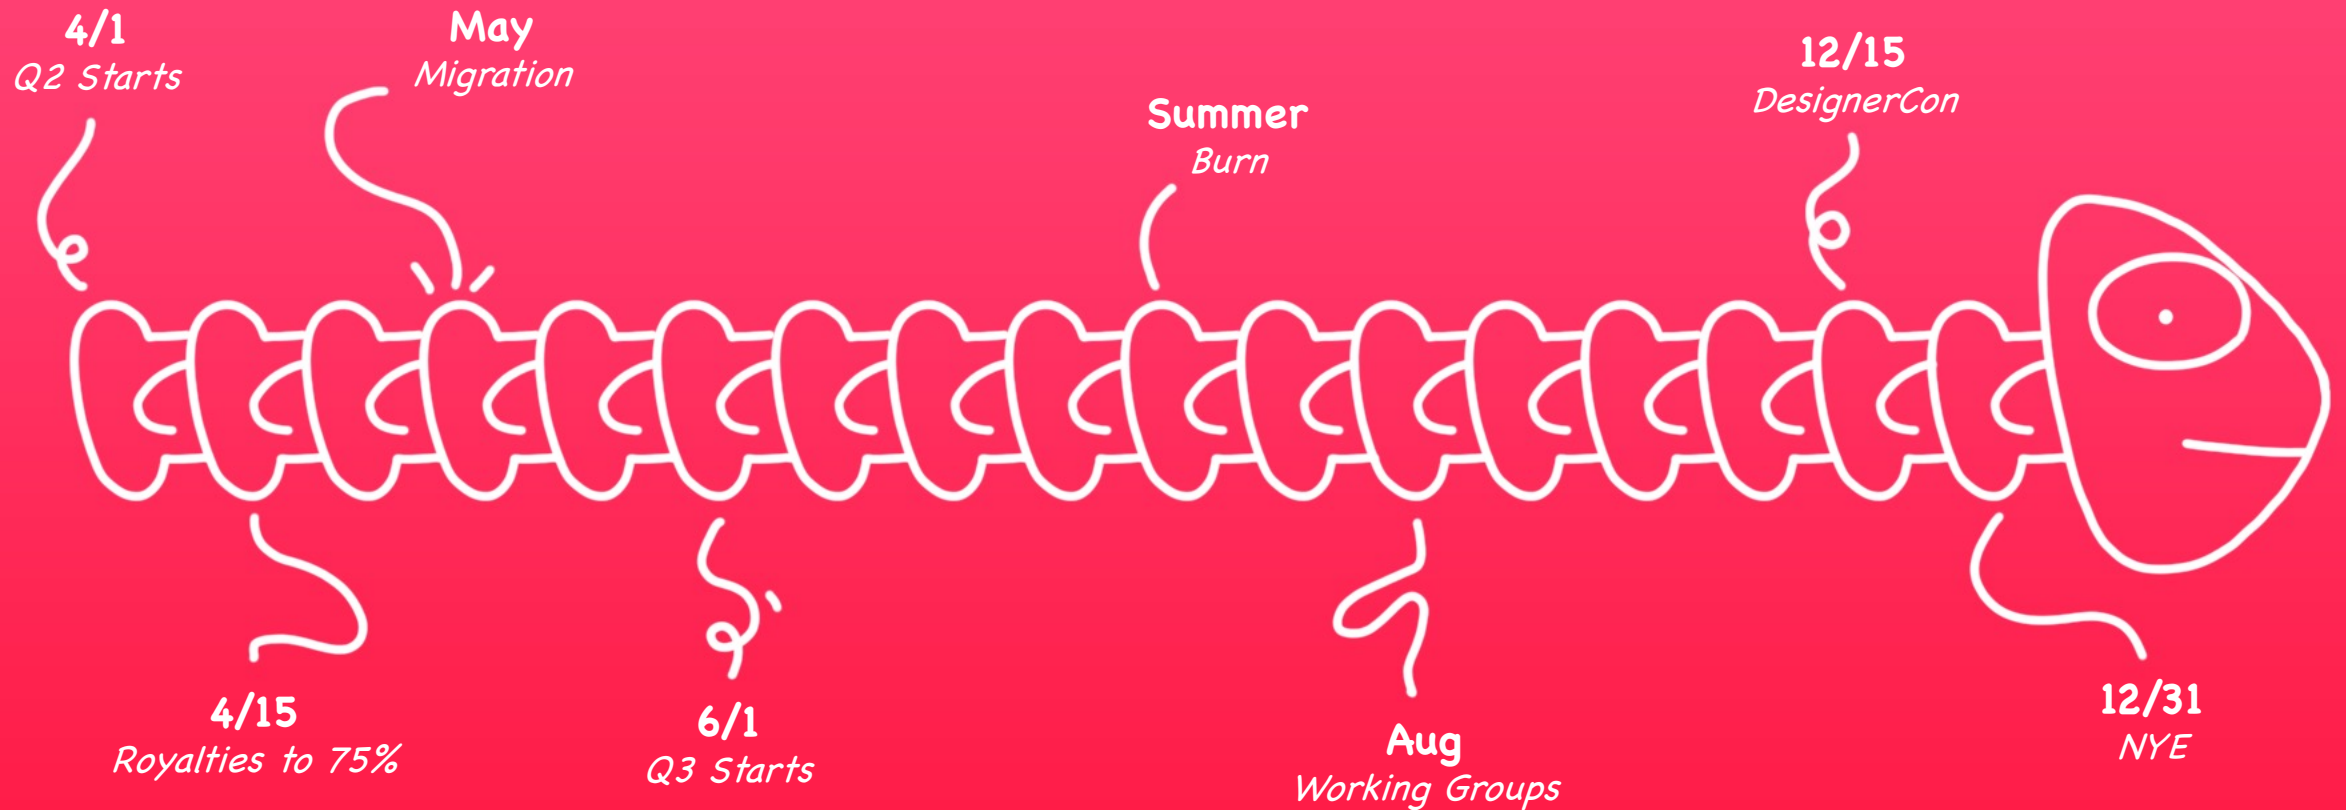

Wen!

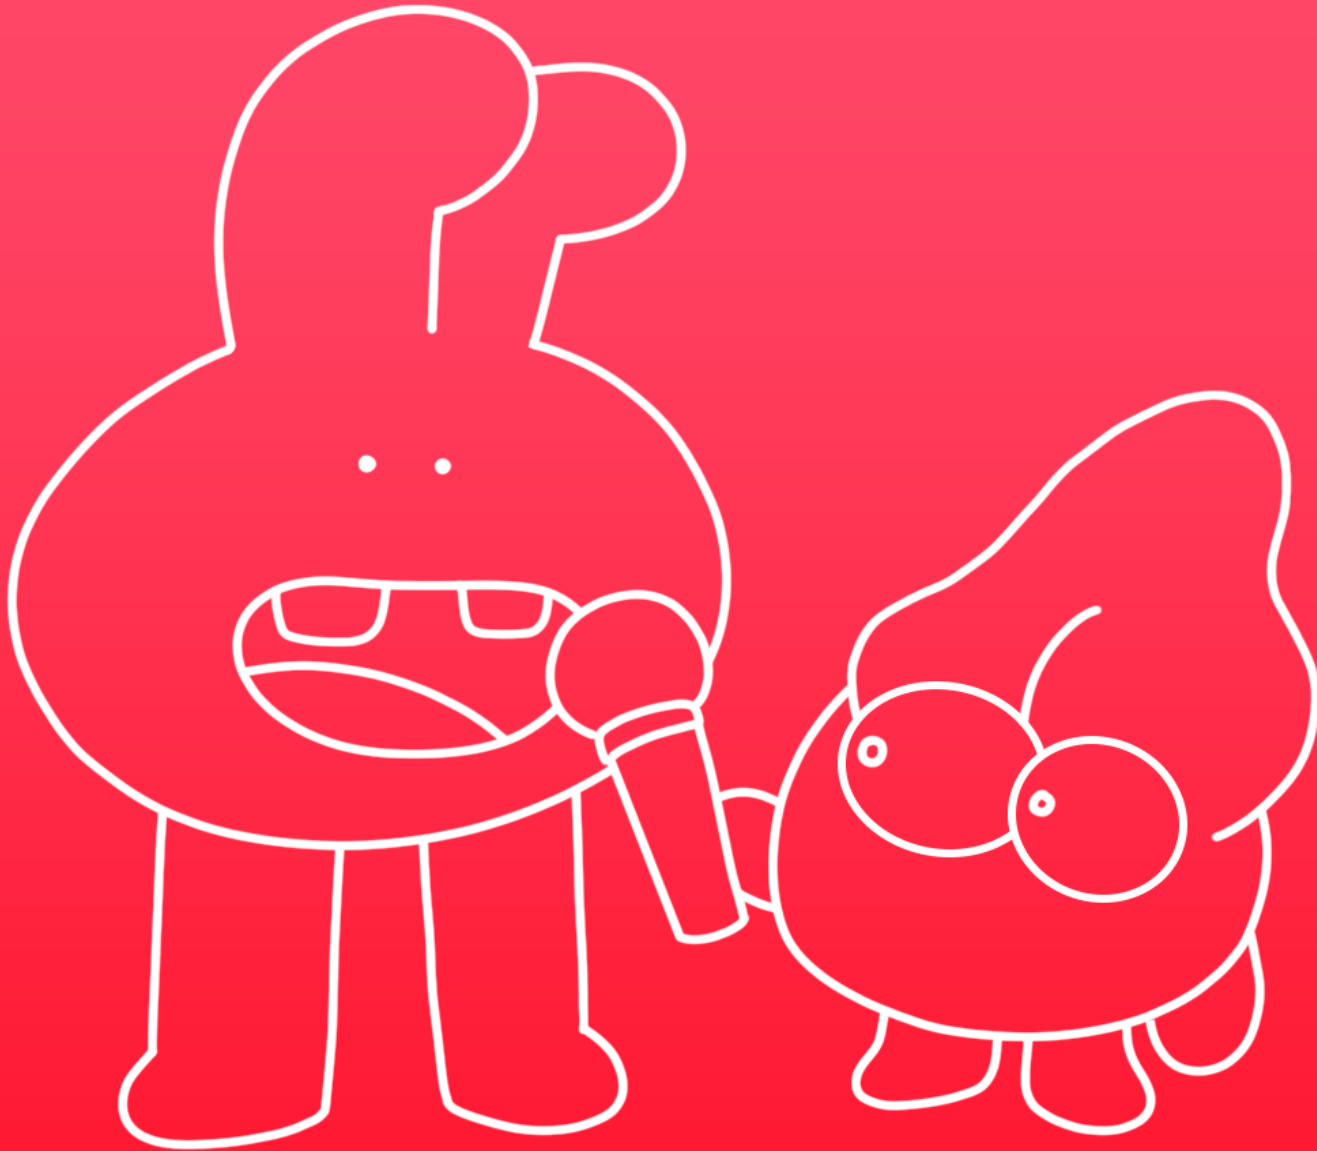

The timeline is loose and subject to change, things happen.

Timeline

How it should unfold

We'll do our best to keep the Time Wizard on track.

AMA

Who has questions?

*We'll be hosting an AMA in the near future.
In the meantime get those Qs ready!*

BYE

The mothership is calling
We have to prepare the Minimon for their big day!
